

What People are Saying?

“As a nurse, I never learned how to talk to families or really support their emotional health during the NICU. Patient+Family Care actually gave me the education I needed to feel comfortable to finally provide better care!” ~ NICU Nurse

“When I was in the NICU, I felt so alone. My friends and family tried to help but had no idea what I was really going through. The on-line class I found was really what saved my life! I got education I didn't even know I needed and made connections with other families and I realized I really wasn't alone. The community connections have carried on past my hospital discharge and having reliable support has made all the difference to get me through the tough days of parenting a medically fragile child. I recommend this class to EVERY NICU parent.”

~Mom of 26 weeker

“I was put on bed-rest at 30 weeks and I was terrified. I had no idea what to expect. The Surviving Bed-rest Course gave me so much information and alleviated so much anxiety for me! I even felt really prepared for the NICU when we delivered at 34 weeks.”

~ Bed Rest Mom

“Working with Patient+Family Care was easy and pleasant. They are very professional and their customer service is exceptional. We now use them for all the educational needs we can.”

~NICU Manager

“Having the ability to purchase the NICU On Line community for our patients and co-brand it with our organization and customize the content to really fit our community information was the best investment we have made. We are able to provide around the clock support by a trusted leader in the field with minimal impact to our budget but with BIG impact to our patient outcomes and patient satisfaction scores. It's truly a win-win situation”

~ Director, Women and Children Services

“I was on bed-rest for 6 weeks and Patient+Family Care gave me the encouragement and support I needed to stay compliant with my bed-rest orders. I now have a happy and healthy baby! THANK YOU Patient+Family Care!”

~Bed-rest mom

“I love seeing the live presentations at conferences I go to. They are always engaging and I learn so much.”

~NICU Nurse

“I was scared to leave my baby in the NICU after I was discharged. And I remember at 2 am when I would get up to pump I craved connection to other parents, and I was able to find that on-line and it saved my emotional health more than anyone will ever know.”
